Class I GBP:	GBP 500,000	GBP 125,000
Class I USD:	USD 1,000,000	USD 250,000

WHAT IS THIS PRODUCT?

China Fund (the “**Sub-Fund**”) is a sub-fund of the Matthews Asia Funds (the “**Fund**”) which is constituted in the form of an umbrella mutual fund. It is domiciled in Luxembourg and its home regulator is the *Commission de Surveillance du Secteur Financier*.

[^] The ongoing charges figures for Class A Shares and Class I Shares are capped at 2.00% and 1.50% respectively, per annum of the average NAV of the relevant share class and shall not exceed such maximum level. Should the actual ongoing charges figure exceed such maximum level, the Fund Manager shall waive fees and/or reimburse expenses to the extent necessary to limit the ongoing charges to the stated maximum.

* The ongoing charges figure is based on expenses for the fiscal year ended 31 March 2017 as stated in the Fund’s annual report dated 31 March 2017 and expressed as a percentage over the average NAV of the share class for the corresponding period. This figure may vary from year to year.

OBJECTIVE AND INVESTMENT STRATEGY**Objective**

The Sub-Fund seeks to achieve long-term capital appreciation.

Strategy

Under normal market conditions, the Sub-Fund seeks to achieve its investment objective by investing at least 80% of its total net assets, directly, or indirectly through collective investment schemes, convertible securities or other similar instruments, in equities of companies located in China.* On an ancillary basis, the Sub-Fund may invest in other permitted assets on a worldwide basis including equities, and other securities which are transferrable, collective investment schemes, and/or other similar instruments admitted to or dealt in on a Regulated Market[†], and other assets which are considered by the Sub-Fund to be of good potential growth in its value and which may, thus, increase the overall value of the Sub-Fund's investment portfolio.

A company is considered to be "located" in a country if it (i) is organized under the laws of that country; (ii) derives at least 50% of its revenues or profits from goods produced or sold, investments made, services performed, or has at least 50% of its assets located within that country; (iii) has the primary trading markets for its securities in that country; or (iv) is a governmental entity or an agency, instrumentality or political subdivision of that country.

The Sub-Fund may invest significantly in smaller companies with growth potential and good investment value. Larger portions of stocks of such smaller companies may be held by a small number of investors (including founders and management) in the companies than is typical of larger companies.

The Sub-Fund may invest (whether directly or indirectly) in China A Shares, either directly via a Qualified Foreign Institutional Investor ("QFII") license awarded to a Matthews group entity, or via the Shanghai-Hong Kong Stock Connect and/or the Shenzhen-Hong Kong Stock Connect programs (collectively the "Stock Connects"), or indirectly via investment in access products. In any event where the Sub-Fund invests directly in China A Shares, under normal market conditions, it is expected that the Sub-Fund will not hold more than 10% of its net assets in China A Shares. The Sub-Fund may directly invest not more than 10% of its total assets in China B shares.

Although the Sub-Fund does not intend to exceed the limits on direct investment in China A and B Shares as described above, it is possible that, under certain market conditions, the Sub-Fund may hold (directly and indirectly) up to 30% of its net assets in aggregate in China A and B Shares. As such, the Sub-Fund may be subject to a higher degree of risk and volatility.

The Sub-Fund is not currently using, and has no intention to use, financial derivative instruments for any purpose, whether for hedging, investment or efficient portfolio management purposes. Should the Sub-Fund propose to change this policy in the future, the Fund will seek prior approval to do so from the Securities and Futures Commission ("SFC") and will give all Shareholders at least one month's prior notice before such change taking effect.

WHAT ARE THE KEY RISKS?

Investment involves risks. Please refer to the offering document for details including the risk factors.

- **General Investment Risk**

The Sub-Fund's investment portfolio may fall in value due to any of the key risk factors below and therefore your investment in the Sub-Fund may suffer losses. There is no guarantee of the repayment of principal.

- **China Investment Risk**

The Sub-Fund invests primarily in companies located in China and is subject to applicable laws, rules and regulations of the People's Republic of China ("China" or "PRC"). The Chinese government exercises significant control over China's economy through its industrial policies (e.g., allocation of resources and other preferential treatment), monetary policy,

* For the purpose of this Sub-Fund, "China" consists of the People's Republic of China, its administrative regions and other districts, such as Hong Kong, as well as Taiwan.

† "Regulated Market" generally includes regulated market in any Member States of the EU or any other state in Eastern and Western Europe, Asia, Africa, Australia, North and South America and Oceania, which operates regularly and is recognized and open to the public.

management of currency exchange rates and management of the payment of foreign currency-denominated obligations. Changes in these policies could adversely impact affected industries or companies. China's economy, particularly, its export-oriented industries, may be adversely impacted by trade or political disputes with China's major trading partners, including the U.S. In addition, as its consumer class emerges, China's domestically oriented industries may be especially sensitive to changes in government policy and investment cycles.

- **Equity Market Risk**

The Sub-Fund's investment in equity securities is subject to general market risks, whose value may fluctuate due to various factors, such as changes in investment sentiment, political and economic conditions and issuer-specific factors.

- **Concentration Risk**

The Sub-Fund's investments are concentrated in companies located in China. The value of the Sub-Fund may be more volatile than that of a fund having a more diverse portfolio of investments. The value of the Sub-Fund may be more susceptible to adverse economic, political, policy, foreign exchange, liquidity, tax, legal or regulatory event affecting the China region.

- **Emerging Markets Risk**

The Sub-Fund invests primarily in companies located in China which is an emerging market. Investing in emerging markets may involve increased risks and special considerations not typically associated with investment in more developed markets, such as liquidity risks, currency risks/control, political and economic uncertainties, legal and taxation risks, settlement risks, custody risk and the likelihood of a high degree of volatility.

- **Risk Associated with High Volatility of the Equity Market in China**

High market volatility and potential settlement difficulties in the markets may also result in significant fluctuations in the prices of the securities traded on such markets and thereby may adversely affect the value of the Sub-Fund.

- **Risk Associated with Regulatory Requirements of the Equity Market in China**

Securities exchanges in China typically have the right to suspend or limit trading in any security traded on the relevant exchange. The government or the regulators may also implement policies that may affect the financial markets. All these may have a negative impact on the Sub-Fund.

- **Risk Associated with Investment in China A Shares**

The Sub-Fund may invest in securities of companies based in the PRC, listed and traded on China's domestic stock exchanges and denominated in renminbi ("**China A Shares**"). The Sub-Fund's investment in China A Shares is subject to general market risks, whose value may fluctuate due to various factors, such as changes in investment sentiment, political and economic conditions and issuer-specific factors. Investments in China A Shares may be more susceptible to adverse economic, political, policy, foreign exchange, liquidity, tax, legal or regulatory events affecting the PRC. China A Shares may have lower liquidity and their prices are more volatile to adverse economic developments than those of securities traded in a more developed market.

- **Risk Associated with Investment made through QFII Regime**

The Sub-Fund may suffer losses if there is insufficient QFII quota allocated for the Sub-Fund to make investments, the approval of the QFII status of the Investment Manager is being revoked, terminated or otherwise invalidated as the Sub-Fund may be prohibited from trading of relevant securities and repatriation of the Sub-Fund's monies, or if any of the key operators or parties (including the QFII custodian or brokers) is bankrupt, in default, or is disqualified from performing its obligations (including execution or settlement of any transaction or transfer of monies or securities).

- **Risk Associated with the Stock Connects**

The relevant rules and regulations on the Stock Connects are subject to change which may have potential retrospective effect. The Stock Connects are subject to quota limitations. Where a suspension in the trading through the program is effected, the Sub-Fund's ability to invest in China A Shares or access the PRC market through the program will be adversely affected. In such event, the Sub-Fund's ability to achieve its investment objective could be negatively affected.

- **PRC Tax Risk**

There are risks and uncertainties associated with the current PRC tax laws, regulations and practice in respect of capital gains realized via QFII quota or Stock Connects or access products on the Sub-Fund's investments in the PRC (which may

have retrospective effect). Any increased tax liabilities on the Sub-Fund may adversely affect the Sub-Fund's value. Because the Sub-Fund did not hold any China A Shares prior to 17 November 2014, based on professional and independent tax advice, the Sub-Fund will not make any provisions for tax on gross realized or unrealized capital gains derived from trading China A Shares.

- **Currency and Conversion Risk**

Underlying investments of the Sub-Fund may be denominated in currencies other than the base currency of the Sub-Fund, in particular the Chinese renminbi ("**RMB**"). RMB is currently not freely convertible and is subject to exchange controls and restrictions. Non-RMB based investors are exposed to foreign exchange risk and there is no guarantee that the value of RMB against the investors' base currency (for example HKD) will not depreciate. Any depreciation of RMB could adversely affect the value of investor's investment in the Sub-Fund. Although offshore RMB (CNH) and onshore RMB (CNY) are the same currency, they trade at different rates. Any divergence between CNH and CNY may adversely impact investors.

Also, a class of shares may be designated in a currency other than the base currency of the Sub-Fund. The NAV of the Sub-Fund may be affected unfavorably by fluctuations in the exchange rates between these currencies and the base currency and by changes in exchange rate controls.

- **Risk Relating to Dividends Paid out of Capital**

Payment of dividends out of capital and/or effectively out of capital amounts to a return or withdrawal of part of an investor's original investment or from any capital gains attributable to that original investment. Any such distributions may result in an immediate reduction of the NAV per share of the Sub-Fund.

- **Non-hedging Risk**

The Sub-Fund does not currently use hedging techniques to attempt to offset certain market risks. Hedging against a decline in the value of a portfolio position seeks to establish other positions which are designed to gain from the decline in the value of a portfolio position and, thus, moderate the values of, or prevent losses to, the Sub-Fund, if the value of its portfolio position declines. Non-use of hedging techniques may expose the Sub-Fund to the risk of full losses resulting from the decline in the value of its portfolio positions, thereby subjecting its NAV to greater fluctuation than if such hedging techniques had been utilized.

HOW HAS THE SUB-FUND PERFORMED?

- Past performance information is not indicative of future performance. Investors may not get back the full amount invested.
- The performance shown is for the representative Class A (Acc) USD. Class A (Acc) USD is selected as the representative share class as it is open for investment by Hong Kong retail investors and broadly indicative of the Sub-Fund’s performance characteristics. Past performance for all other share classes is in English only from the Hong Kong Representative upon request.
- The bar chart shows the representative share class’ yearly returns. The returns are provided for all the years for which performance data is available for the complete calendar year since the launch of the representative share class. Where no past performance is shown, there is insufficient data available in that year to provide a useful indication of past performance to investors.
- The computation basis of the performance is based on the calendar year end, NAV-to-NAV, with dividends reinvested.
- Performance figures have been calculated in USD, including ongoing charges and excluding any subscription fee and redemption fee you might have to pay.
- The Benchmark for the Sub-Fund is the MSCI China Index.
- Sub-Fund launch date: 26 February 2010.
- Class A (Acc) USD launch date: 26 August 2010.

IS THERE ANY GUARANTEE?

This Sub-Fund does not have any guarantees. You may not get back the full amount of money you invest.

ADDITIONAL INFORMATION	
<ul style="list-style-type: none"> You generally buy and redeem shares at the Sub-Fund's next-determined NAV after the Hong Kong Representative receives your request in good order on or before 6:00PM (Hong Kong Time) on a Valuation Day which is also a Hong Kong Business Day, being the dealing cut-off time. Third party distributors may impose different dealing deadlines for receiving requests from investors. The NAV of this Sub-Fund is calculated, and the price of shares published in the South China Morning Post and the Hong Kong Economic Journal in Hong Kong, on each Valuation Day which is also a Hong Kong Business Day. The composition of dividends (<i>i.e.</i> the relative amounts paid out of net distributable income and capital), if any, paid on the distribution shares of the Sub-Fund for the preceding 12 months is available from the Fund or the Hong Kong Representative upon request.
