

Risk Considerations

Investment involves risk. It is possible to lose the principal capital of your investment. | The Fund invests primarily in Asian countries and economies. Investment in such emerging markets may be subject to increased risks such as political, tax, economic, market, liquidity, custody and settlement, currency, legal and regulatory risks. | The Fund may, at its discretion, pay dividends out of the capital or effectively out of capital in respect of the distribution shares. Payment of dividends out of capital and/or effectively out of capital represents a return or withdrawal of part of an investor's original investment, or from any capital gains attributable to that original investment. Such dividends may result in an immediate reduction of the net asset value per share of the Fund. | The Fund invests primarily in equity securities, which may result in increased volatility. | The Fund may invest in smaller companies which are likely to carry higher risks than larger companies. | The Fund does not hedge to attempt to offset certain market risks. This may expose the Fund to the risk of full losses resulting from a decline in a security's value. | Investors should not invest in the Fund solely based on the information in this material alone. Please contact Matthews Global Investors (Hong Kong) Limited for further details of the risk factors.
