 <p><i>"The Fund may, at its discretion, pay dividends out of the capital or effectively out of capital in respect of the distribution shares. Dividends may be distributed out of gross income while all or part of the fees and expenses are paid out of capital, resulting in an increase in distributable income for the payment of dividends and, therefore, the Fund may effectively pay dividend out of capital. Payment of dividends out of capital and/or effectively out of capital represents a return or withdrawal of part of an investor's original investment, or from any capital gains attributable to that original investment. Any distribution may result in an immediate reduction of the net asset value per share of the Fund. Please note that a positive distribution yield does not imply a positive return, and past yields are no guarantee of future yields. There is no guarantee that the Fund will pay or continue to pay distributions. Investment involves risk. Past performance is not a guide to future performance. Investment return and principal value will fluctuate with changing market conditions so that shares, when redeemed, may be worth more or less than their original cost. Investors should not make any investment decision solely based on information contained in the table above. Please refer to the Hong Kong offering document (including the key facts statement) of the Fund for further details including the risk factors. The information contained in this table is issued by Matthews Global Investors (Hong Kong) Limited and has not been reviewed by the Hong Kong Securities and Futures Commission."</i></p>						
0417-W141						
*As of April 1, 2014, distributions for this class of the sub fund will pay gross income which may result in expenses being paid out of capital and thereby limit an investor's potential to generate total return and income.						
† "Net distributable income" means the net investment income (i.e. dividend income and interest income net of fees and expenses) attributable to the relevant share class of the Fund based on unaudited management accounts. "Net distributable income" that has been accrued as at the end of a financial year that hasn't already been distributed and is declared and paid as dividends at the next distribution date immediately after that financial year end is treated as "net distributable income" in respect of that financial year. Also, for the purpose of this Dividend Composition Information, "net distributable income" does not include any income equalisation adjustments."
