INVESTMENT APPROACH

Matthews Asia believes in the long-term growth of Asia, one of the world's fastest-growing regions. Since 1991, we have focused our efforts and expertise in these countries, investing through a variety of market environments. Matthews Asia is the largest dedicated Asia-only investment specialist in the United States. With \$33.9 billion in assets under management as of June 30, 2018 Matthews Asia employs a bottom-up, fundamental investment philosophy with a focus on long-term investment performance.

## Investment Objective

Long-term capital appreciation.

## Strategy

Under normal market conditions, the Fund seeks to achieve its investment objective by investing at least 80% of its total assets, which include borrowings for investment purposes, in the common and preferred stocks of Small Companies located in China. China includes its administrative and other districts, such as Hong Kong. The Fund seeks to invest in smaller companies capable of sustainable growth based on the fundamental characteristics of those companies, including balance sheet information; number of employees; size and stability of cash flow; management's depth, adaptability and integrity; product lines; marketing strategies; corporate governance; and financial health.

## Risks

All investments involve risks, including possible loss of principal. Investing in international and emerging markets may involve additional risks, such as social and political instability, market illiquidity, exchange-rate fluctuations, a high level of volatility and limited regulation. In addition, single-country and sector funds may be subject to a higher degree of market risk than diversified funds because of concentration in a specific industry, sector or geographic region.

- After contractual fee waiver, expense reimbursement and/or recoupment effective through April 30, 2019.
- The lesser of fiscal year 2017 long-term purchase costs or sales proceeds divided by the average monthly market value of long-term securities.
- The MSCI China Small Cap Index is a free float—adjusted market capitalization-weighted small cap index of the Chinese equity securities markets, including H shares listed on the Hong Kong Exchange, B shares listed on the Shanghai and Shenzhen exchanges, and Hong Kong-listed securities known as Red Chips (issued by entities owned by national or local governments in China) and P Chips (issued by companies controlled by individuals in China and deriving substantial revenues in China). Index is for comparative purposes only and it is not possible to invest directly in an index.
- Calculated from 5/31/11.
- The Lipper Category Average does not reflect sales charges and is based on total return, including reinvestment of dividends and capital gains for the stated period.

**Performance assumes reinvestment of all dividends and/or distributions before taxes. All performance quoted represents past performance and is no guarantee of future results. Investment return and principal value will fluctuate with market conditions so that when redeemed, shares may be worth more or less than their original cost. Current performance may be lower or higher than the return figures quoted. Returns would have been lower if certain of the Fund's fees and expenses had not been waived.
